

THE FORT STOCKTON PIONEER

January 23, 2020

PERMIT GRANTED FOR REFINERY

MMEX Resources Corp. was approved for its production permit for water at their site of a refinery in Pecos County.

The well is on 125.908 acres, 20 miles northeast of Fort Stockton off FM 1053.

It will yield 20 acre-feet for industrial use out of the Edwards-Trinity Aquifer.

"He's done everything he's required to do," said General Manager Ty Edwards.

MMEX CEO Jack Hanks spoke to the board and gave an update on the crude installation unit that will handle 10,000 barrels a day.

"It's a simple refinery," said Hanks.

Hanks said they are working through the financing phase and making progress.

He hopes to close out on the finances in the next quarter.
